SKILLS

Adaptability, Reflexion, Self-driven

Backend (Node.js, PHP)

Frontend (ES6, React, jQuery)

DevOps (Docker, CI)

Babel, Webpack, Jest, Next,
Flowtype, Ubuntu, Atom, git...

SENIOR FULL-STACK WEB ENGINEER

EXPERIENCE

Lead / Full-Stack Developer - Devanco

7 years / since 2011

Freelancing for different clients: OuiCar, Airbus, Devatics, RocketLinks, Melty Group.

Open source contributor: <https://github.com/notifme>.

Internal projets: <https://nbox.notif.me> / crypto-asset trading bot.

Full-Stack Developer, Lead Front - OuiCar (Freelance)

(5 years) / 2012 - 2017

Architecture, Backend (PHP Zend, Node.js), Frontend (React), DevOps (Docker, Jenkins).

I globally built 30% of the platform, which now handles hundreds of thousands of bookings. Here is what I've learned:

- Integration of external APIs (emails, SMS, payments, helpdesk...)
- State management (of the bookings) and processus handling in a complex system.
- Search / Indexation (of the cars).
- Technical debt management / KISS / YAGNI.
- Startup world specifics (GTD, prioritize tasks with the greatest value for growth, handling TV appearance peaks...)

R&D / Developer / Lead developer - Sopra-Steria

2 years / 2009 - 2011

Java J2EE / Geomatics (PostGis, OpenLayers, GeoTools, Mapserver).

EDUCATION

Computer Sciences and Applied Mathematics Engineer

2006 - 2009, ENSEEIHT, Toulouse, France

Higher School Preparatory Classes

2004 - 2006, Grenoble, France
